

**Sue Evans**

NCETM Accredited PD lead

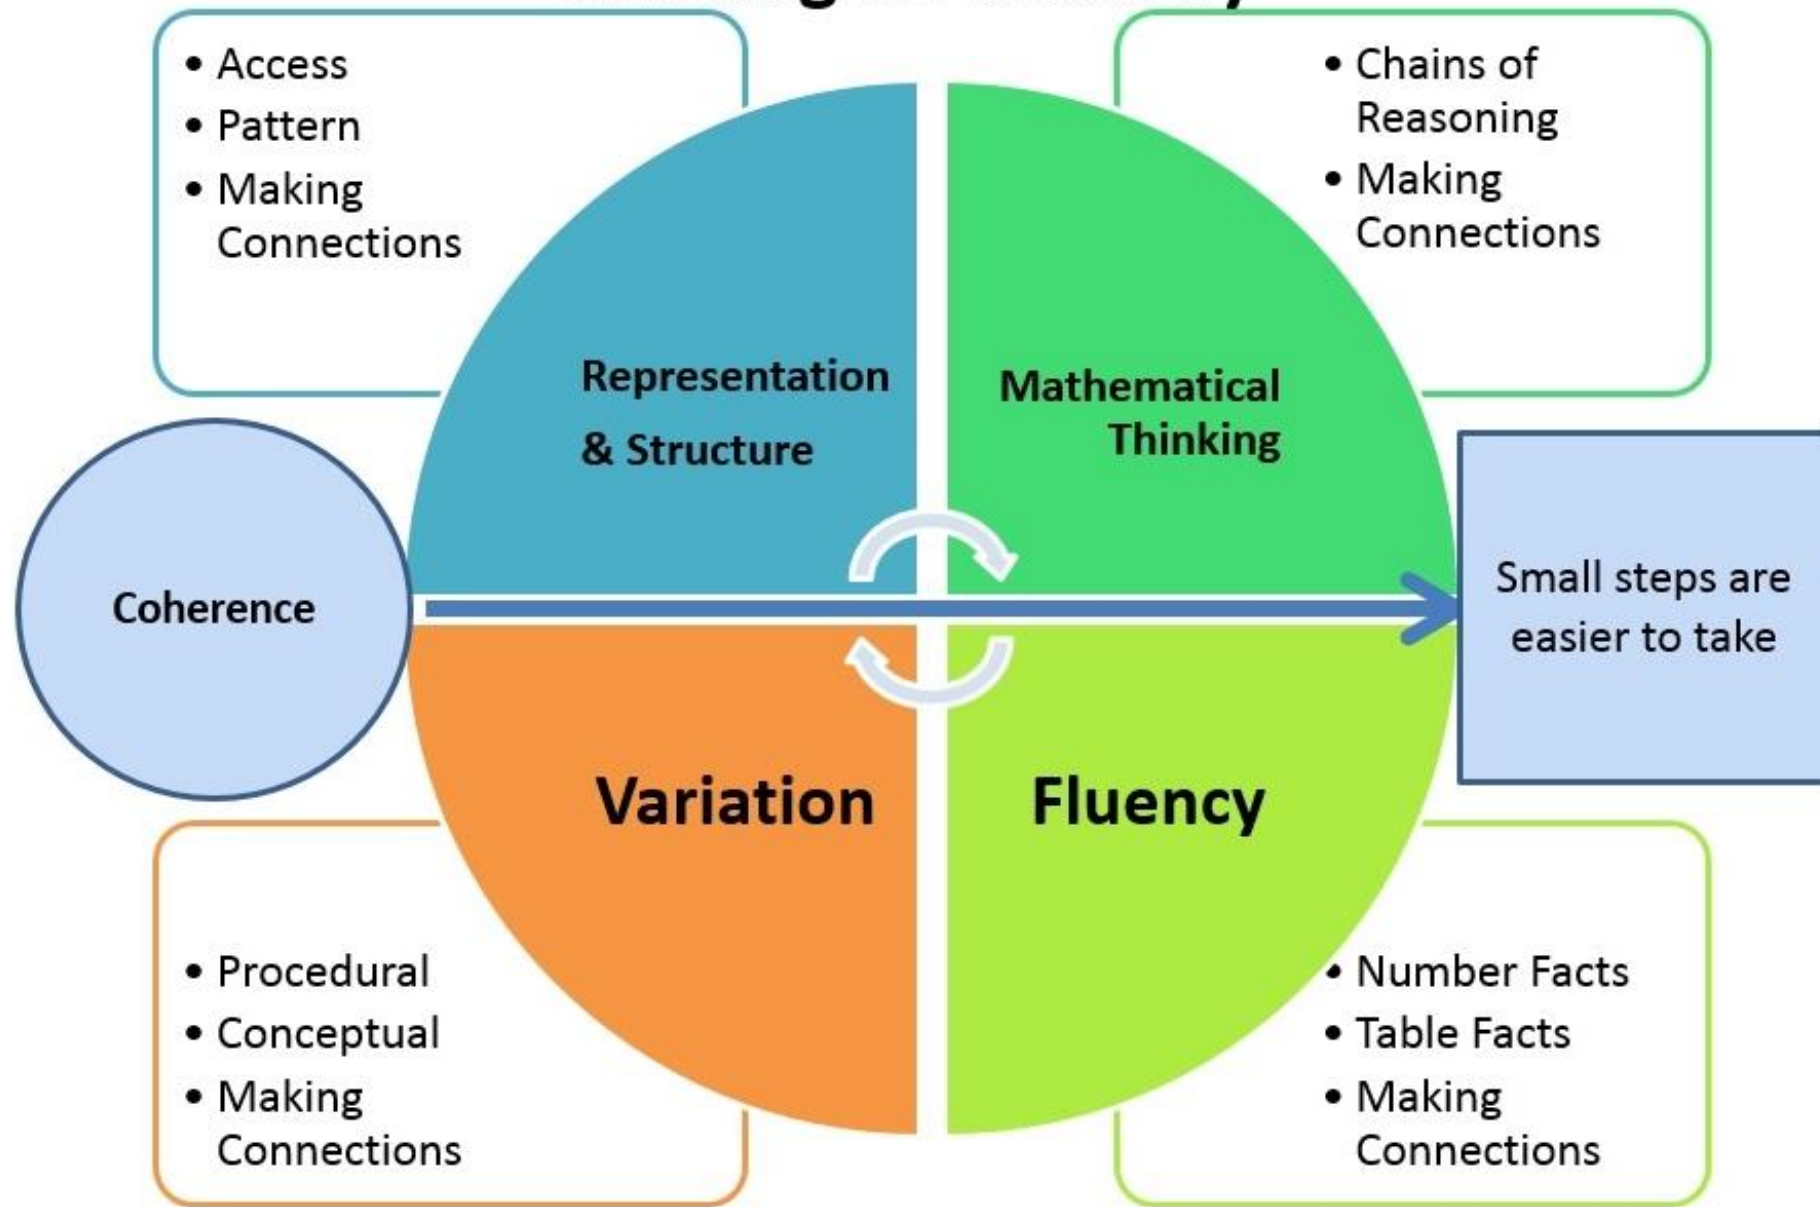

Year 1 - Mastery of Number

# Aims of session

- Identify some of challenges specific to Year 1
- Consider the progression from **counting** and **composition** strands in Early Years - how do we build on good foundations?
- Share NCETM materials and consider how to use them most effectively

# Teaching for Mastery

# What are the challenges specific to Year 1?

- Moving from a play based curriculum into - potentially - more 'formal' learning
- Substantial content in the National Curriculum
- The hardest numbers for the youngest children! 'teen' / 'ty'
- Developing working memory can make reasoning more difficult?

# How can we support transition from the main areas of learning in YR?

- **Cardinality and counting**

*Subitising:* recognising small quantities without needing to count them all

*Conservation:* knowing that the number does not change if things are rearranged (so long as none have been added or taken away)

- **Composition**

Part–whole relationships: identifying smaller numbers within a number (conceptual subitising – seeing groups and combining to a total)

# The place of counting in Year 1

- Consolidating counting skills - *how many objects?*
- Revealing **patterns** in the number system
- Revealing the **structure** of the number system (place value)
- Unitising

## 1.9 Composition: 20–100 – step 1:1

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

## 1.9 Composition: 20–100 – step 1:1

1000	2000	3000	4000	5000	6000	7000	8000	9000
100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

67

sixty-seven

\_\_tens and \_\_ones

How many shoes are there?  
Count in groups of two.

60 gals  
20

How many two-pence coins would you need to buy this eraser?

**How would *you* want children to find the totals?**  
**How might *your children* want to find the totals?**

$$5 + 3$$

$$8 + 5$$

# Moving from counting to calculating

‘It is clear that there are many children who, even by the end of primary school, **rely more on procedures such as counting** to find the answer to calculations and **do not make as much progress.**’

**Askew (1997)**

**Gray and Tall (1994)** argue that higher attaining children **use number facts flexibly** to calculate.

# What can calculating *without* counting look like?

$$8 + 5 =$$

$$10 + 3 =$$

$$10 + 3 =$$

# What knowledge and skills are needed to be able to calculate using transformations?

- Subitising small numbers of counters
- Knowing partitions for one digit numbers
- Understanding that partitioning leaves the total unchanged (conservation)
- Recognising the 'ten and a bit' in teen numbers (quantity place value)

# Part-whole relationships throughout the curriculum

- Underpins concepts involved in additive and multiplicative relationships
- Underpins later fraction work
- Supports children in development understanding (and recall) of number facts
- Supports calculating without counting

## 1.2 Introducing 'whole' and 'parts': part–part–whole

Representations | Year 1

**Mastery Professional Development**  
*Number, Addition and Subtraction*

Autumn 2017 pilot

# Thinking about language...whole or hole?

# Potential misconceptions about parts and wholes

# Which Numberblock made these shapes?

How do you know?

Is there another shape he can make?

# Numberblocks - Fruit Salad!

# Double sided resources

# Eight ducks

Griffiths, Back & Gifford (2016) *Making numbers*

# Oxford Owl - Five Friends Counting

Oxford Owl; PD books; Making Numbers

<https://www.oxfordowl.co.uk/welcome-back/for-school-back/default/series-landing-pages/pd-books/making-numbers>

# Five (class animal) friends

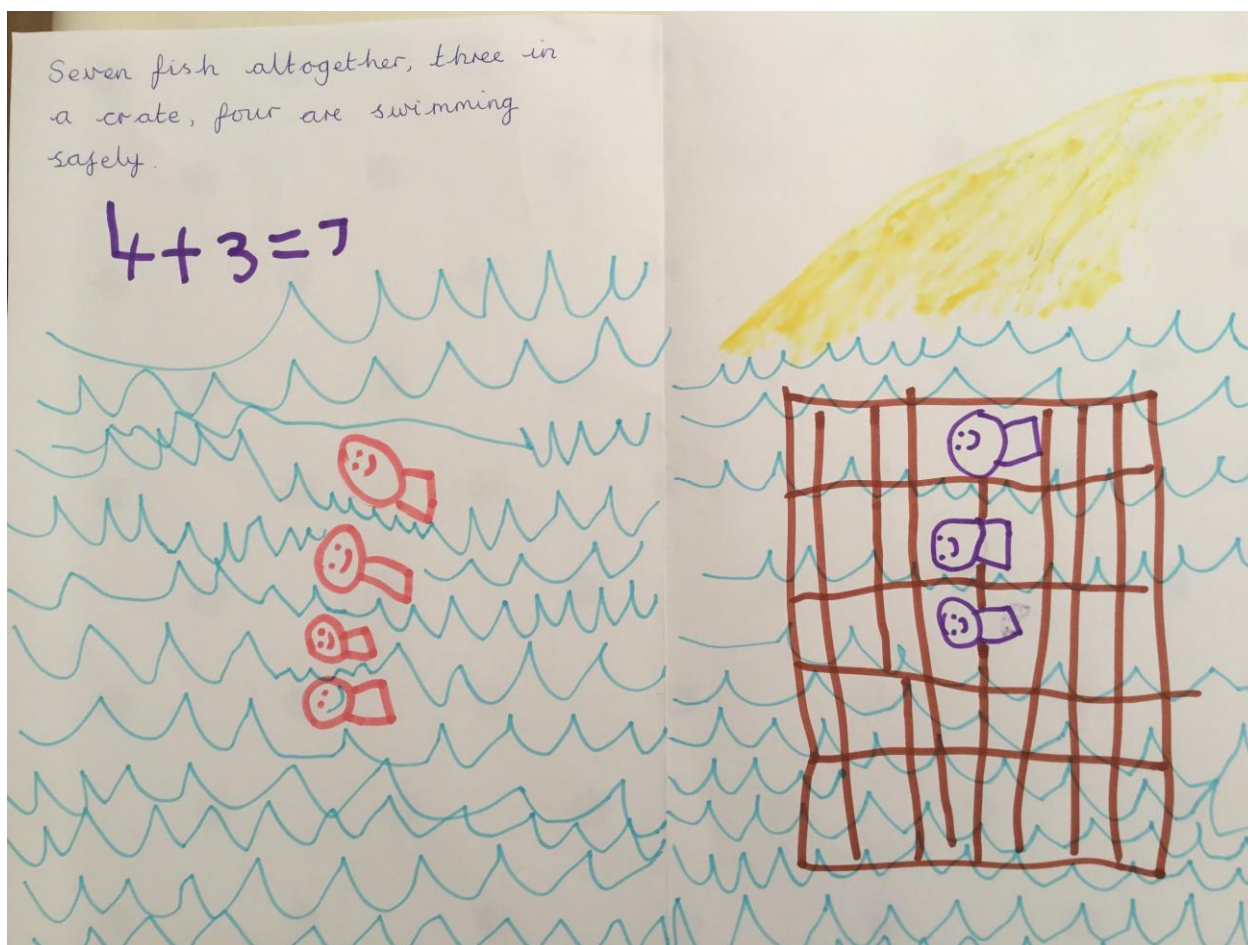

# Are/ are NOT

# A number can be partitioned into different pairs

'I'm going to put half of the 7 fish in the crate....'

# Being systematic

	Blue	Red
	0	5
	1	4
	2	3
	3	2
	4	1
		

# 'Five and a bit'

# Relating knowledge to 'number facts'

$$5 + 3 = 8$$

## Using variation - Five or *not* five?

$0 + 5$

$2 + 3$

$5 + 1$

$3 + 1$

$4 + 1$

$2 + 2$

# Mindful practice - which number statements have the same sum?

$0 + 4$

$2 + 3$

$5 + 1$

$3 + 3$

$3 + 1$

$3 + 2$

**True or false? How do you know?**

$$4 + 1 = 3$$

$$7 = 2 + 5$$

$$3 + 4 = 7$$

$$4 = 0 + 5$$

# 'Takeaway'...

- Is there anything you can use with your children straightaway?
- What discussions will you have with your fellow practitioners?
- When can you plan some time for your own PD? What can you do?
- Will you need a discussion with your SLT?
