

Learning to Teach Mathematics

A Collaborative Online Conference for Early Career Teachers
Wednesday 7th July 1.00-5.30pm

Keynote: Dyscalculia in Mathematics Classrooms

An introduction to supporting learners with mathematical difficulties in school

Sarah Ankers

Sarah is Deputy Head of ITE at the University of Chester, and has been instrumental in designing and teaching a ground-breaking MA in Dyscalculia Research and Practice at the University of Chester. She will share her insight into research-informed mathematics teaching that is inspired by her work at the University as well as her breadth of experience teaching and leading mathematics across several key stages. Sarah will help you to understand the nature of dyscalculia and provide starting points for beginning mathematics teachers to develop a more inclusive classroom.

University of
Chester

Workshops include

Mastery learning in mathematics
